What am I, stupid?

Drinking alcohol can affect your brain cells, which help you think and move normally. This could make you do all sorts of things that are not like you.

What would you say to "NO" to alcohol?

You're not alone. Thickness and you tip your wall.

Alcohol makes your dizzy. You can't walk.

God another one? Let's hear it!

Yeah, and I'll jump off a cliff, too.

When you know how to say "NO," it's easier to do so.

It's important to say "NO," because alcohol can change your body, change the way you think, even change your personality. Visit ASKLISTENLEARN.COM for games, activities, and more information.
